XE

XE is a system platform we designed to address ergonomics in the broader sense of it's original meaning.

People tend to use ergonomics to describe the design of objects but in reality it is about the relationship between a person and the things around them.

The Greek word ergonomics is a composite for the word work and natural laws. Natural laws for us translate into addressing human needs helping them to perform in the best possible way. This is why we focus to create spaces with those needs in mind.

XE allows providing solutions around tables, houses, storage and seating integrating needs for privacy, acoustics, color and different scenarios.

XE is focusing on a better understanding of space and human needs using design to solve these problems. Objects of value with global charisma.
