Meeting Tables

Meeting Tables

Information is available to download via the website: <https://www.orangebox.com/products>

Meeting Tables - Product Introduction

Lano

Features

- The Lano family consists of **89 variants**
- Defined by its sculptural architectural leg system and generous seating provision.
- A wide range of sizes, shapes and power options from the smallest 1200mm table to the super-large 2000mm x 6200mm conference table for up to 24 delegates.

Convo

Features

- The Convo family consists of **82 variants**
- Flip top functionality on a range of tops - quick and easy reconfiguration
- Offers fully integrated power and data cable management
- Low profile ski design, which gives stability even when tops are extra deep - top depths range from 700mm to 1200mm.

Cubb Table

Features

- The Cubb Table family consists of **25 variants**
- Available at both work and café height with a choice of timber stains, metal finishes and work surfaces
- Cable management - cables run seamlessly up the legs and are concealed beneath the work surface.
- Structurally smart components add to the range's architectural refinement.

Meeting Tables - Product Introduction

Obvio

Features

- The Obvio family consists of **24 variants**
- An extensive range of reconfigurable, truckable tables
- Allow for individual use or for small or large group configurations
- Power and data can be seamlessly integrated, and the most complex of technological requirements can be configured with 'plug-in & play' simplicity.

Pars

Features

- The Pars family consists of **43 variants**
- A refined range of contemporary work, meeting & conference tables
- Available with three distinctive leg options and a broad range of top sizes
- Ability to be combined with multiple power and data options.

AftD

Features

- The AftD family consists of **104 variants**
- AftD answers the need for more diverse configurations for both personal work and teamwork
- Multiple specification options – for individual use, or for two, four or six people – can be further configured with larger, more open and more inclusive collaborative working configurations at lounge, table or café

Meeting Tables - Product Introduction

BAE

Features

- The BAE family consists of **32 variants**
- Work and café height. Each top can be specified as a single material or as a three-way split to encourage a more personal demarcation of the worktop
- Various Power / data options.
- Can be specified with either an LED task light liner or the adjustable circular Pablo LED task light. Both lights have on/off switches.

Fielding

Features

- The Fielding family consists of **10 variants**
- Come in seventeen different designs accommodating from 4 to 8 people
- Features a generous, fabric-covered hollow structure under the worktop, accommodating abundant power and data cabling
- Fielding tabletops can be specified in a wealth of finishes, including a wide selection of colour laminates, metallic metal finishes, refined wood laminates, and decorative graphic patterns unique to Orangebox.

Library

Features

- The Library family consists of **8 variants**
- A modular industrial solid wood worktable
- Can be specified as a double bay unit for eight people, extendable to a three bay unit for twelve, and manufactured for site installation with a final length of 4520mm.
- These library tables can be specified with a liner LED task light movement and height adjustment.

Meeting Tables - Product Introduction

Hep

Features

- The Hep family consists of **4 variants**
- A low or high table with an upholstered base
- The foam-wrapped structural base can be specified in most fabrics.
- The collection includes four occasional table designs, three café height tables and a wide array of work height tables in various sizes, which are available in our standard wood finishes.

Task and Multi-Use Seating

Task and Multi-Use Seating

Information is available to download via the website: <https://www.orangebox.com/products>

<p>AllowMe</p> 	<p>Eva</p> 	<p>Do</p> 
<p>Being</p> 	<p>Kirn</p> 	<p>Joy</p> 
<p>Spira Plus</p> 	<p>Ara</p> 	<p>Flo</p> 

Task and Multi-Use Seating - Product Introduction

AllowMe

Features

- The AllowMe family consists of **4 variants**
- Our lightest hybrid chair to date at under 9kg
- A patented flexible back support that provides progressive recline action for all users. Unparalleled seat height adjustment range: 430mm - 650mm MBP model (ideal for sit / stand working)
- Flexible seat support for increased comfort and active perching posture at desk heights up to 865mm.

Eva

Features

- The Eva family consists of **6 variants**
- A self-weighting mechanism that intelligently responds to the user's weight, no adjustment necessary - catering for a larger percentage of user demographic and reducing the need for specialist occupational health chairs.
- Eva upholds our commitment to lead by example in environmentally responsible product design and manufacture (50% recycled), while placing a greater emphasis on user experience and comfort.

Kirn

Features

- The Kirn family consists of **3 variants**
- Environmentally smart - advancing our product development towards the standards required by the circular economy.
- Manufactured in Econamid® - producing 97% fewer CO2 emissions.
- An innovate new mechanism and our first fully mesh chair and performance finesse in it's architecture.

Task and Multi-Use Seating - Product Introduction

Do

Features

- The Do family consists of **6 variants**
- An easier to use, more adaptable new generation task chair
- User-centred design and a weight balancing mechanism
- Do doesn't have a multitude of knobs and levers to find and struggle with. We've increased the range of adjustment on offer, while at the same time simplifying how it's delivered.

Being

Features

- The Being family consists of **12 variants**
- Focused on ergonomic excellence, but without a host of controls
- Designed with everyone in mind - adaptability and ease of use a priority
- Their elegant simplicity and discreet functionality allows them to effortlessly blend into the contemporary workplace.

Joy

Features

- The Joy family consists of **10 variants**
- Displaying the technical attributes of more expensive task chairs
- A no-fuss package of features, which takes the competitively priced Joy chair to an advanced level of performance and comfort for individuals, and is also suitable for larger shared installations where individualisation is key.

Task and Multi-Use Seating - Product Introduction

Flo

Features

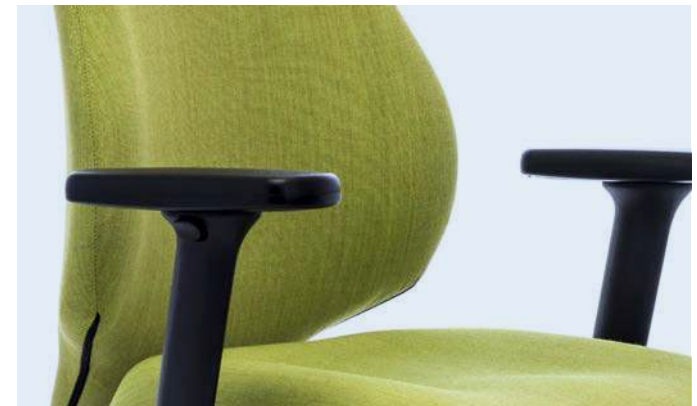

- The Flo family consists of **10 variants**
- Continuous ergonomic research and refinement has defined the form, contours and proportions of the Joy mid back, high back and mesh back chairs.
- The mesh back is manufactured from 100% recyclable polyester and provides a refined level of breathability which ensures less heat build up.

Spira Plus

Features

- The Spira Plus family consists of **8 variants**
- Highly adjustable arms, headrest and back support, including integrated air cells in the lumbar and pelvic area, guarantee a better fit for users.
- The chair also features a retro-fittable headrest and 4D arms, making it suitable for a variety of tasks and applications.

Ara

Features

- The Ara family consists of **4 variants**
- The award-winning Ara is the first task chair developed and manufactured in Europe to achieve Cradle-to-Cradle accreditation.
- Ara offers mesh, polymer and upholstered back options
- Ara also offers an enhanced height and depth-adjustable lumbar pad option, which can be fine-tuned to provide individualised lower back support.

Booths / Media Booths - Product Introduction

Cwtch

Features

- The Cwtch family consists of **29 variants**
- A low, midi & high back sofa system
- Designed to facilitate the creation of exciting, workable sociable clusters
- Cwtch has a cast aluminium leg available in the standard Orangebox finishes and Cwtch High has an additional solid wood leg option and is also available in our standard fabrics.

Coze

Features

- The Coze family consists of **15 variants**
- Coze offers a fresh take on key archetypes for a wide variety of settings.
- Featuring a new, turned wood leg, and offering a refined sitting position enhanced by a soft and supportive back, these new pieces extend the appeal of this successful and universally applied design collection.

AftD

Features

- The AftD family consists of **104 variants**
- AftD answers the need for more diverse configurations for both personal work and teamwork
- Multiple specification options – for individual use, or for two, four or six people – can be further configured with larger, more open and more inclusive collaborative working configurations at lounge, table or café height.

Booths / Media Booths - Product Introduction

Perimeter

Features

- The Perimeter family consists of **47 variants**
- Perimeter ranges from standalone bench and booth units through multiple length contemporary sofas (both low and high back) to linked scenarios for either open collaborative working or – when partially enclosed – greater privacy
- Perimeter's modular elements offer multiple product combinations, configurations and upholstery options.

Coppice

Features

- The Coppice family consists of **12 variants**
- Coppice is a stand-alone, single occupancy work booth that provides a high level of acoustic comfort
- Coppice has been meticulously designed so that a small number of components can facilitate a wide range of configurations, providing varying degrees of privacy to suit different tasks.
